## Continuing Professional Development (CPD) Record Log

To support pharmacies in recording their whole team CPD activity

1. The General Pharmaceutical Council (GPhC) expects the whole pharmacy team to undergo continual professional development
2. During a GPhC visit, the pharmacy will be expected to demonstrate how they are engaging with CPD
3. By using this tracker, you will be able to keep a single, simple record of all of the VirtualOutcomes, and other training courses, the pharmacy team have undertaken.
4. Just add the colleague name to the top of the chart and the training course name down the left and then each time a course is completed, the pharmacy colleague can initial and date the training log.
