

## Primary Care Staff Flu Vaccination Tracker

Community pharmacy contractors are required to provide NHS England and NHS Improvement a summary of the number of frontline primary care staff vaccinated against flu each month. This template can be used to capture the required data for submission at the end of each month on the Manage Your Service (MYS) platform. Collate the answers using a 5-bar gate approach  and then add these up to give you the totals for each sector. The totals will need to be added to the MYS platform when contractors make their flu claims.

Month	Staff vaccinated								Entered onto MYS
	General Practice tally	GP staff total	Community Pharmacy tally	Pharmacy staff total	Dental tally	Dental staff total	Optometry tally	Optometry staff total	
September									<input type="checkbox"/>
October									<input type="checkbox"/>
November									<input type="checkbox"/>
December									<input type="checkbox"/>
January									<input type="checkbox"/>
February									<input type="checkbox"/>
March									<input type="checkbox"/>
